THE ANNALS OF APPLIED BIOLOGY

EDITED BY

R. W. MARSH

AND

I. THOMAS

WITH THE ASSISTANCE OF

F. J. ANSCOMBE
F. C. BAWDEN
J. T. MARTIN
D. J. WATSON

VOLUME 38

CAMBRIDGE
AT THE UNIVERSITY PRESS
1951

Printed in Great Britain at the University Press, Cambridge
(Brooke Crutchley, University Printer)
and published by the Cambridge University Press
London: Bentley House, N.W. 1
American Branch: New York
Agents for Canada, India, and Pakistan: Macmillan

CONTENTS

No. 1 (March 1951)

PAGE

1. The structure and formation of the egg of the fruit tree red spider mite, *Metatetranychus ulmi* Koch. By J. W. L. Beament. (With 8 Text-figures) 1

2. Host alternation in *Aphis fabae* Scop. I. Feeding preferences and fecundity in relation to the age and kind of leaves. By J. S. Kennedy and C. O. Booth. (With 7 Text-figures) 25

3. Aggregation in *Aphis fabae* Scop. I. Aggregation on plants. By Alan Ibbotson and J. S. Kennedy. (With 3 Text-figures) 65

4. The potato tuber nematode, *Ditylenchus destructor* Thorne, 1945; the cause of eelworm disease in bulbous iris. By J. Basil Goodey. (With Plates 1 and 2) 79

5. Investigations on the systemic insecticidal action of sodium fluoroacetate and of three phosphorus compounds on *Aphis fabae* Scop. By W. A. L. David and B. O. C. Gardiner. (With 5 Text-figures) . . 91

6. The insecticidal activity of parathion, its isomers and some related compounds. By D. Woodcock and A. Stringer. (With 1 Text-figure) . 111

7. The control of wireworm by gamma benzene hexachloride: the development of a seed dressing for cereals. By H. R. Jameson, F. J. D. Thomas and C. C. Tanner. (With 8 Text-figures) 121

8. The efficiency of chemical treatments of vegetable seeds against seed-borne and soil-borne organisms. By Harry Jacks. (With 4 Text-figures) 135

9. Microbiological control of *Botrytis cinerea* Pers. I. The role of pH changes and bacterial antagonism. By F. J. Newhook. (With 2 Text-figures) 169

10. Microbiological control of *Botrytis cinerea* Pers. II. Antagonism by fungi and actinomycetes. By F. J. Newhook 185

11. The control of diseases of lettuce by the use of antagonistic organisms. I. The control of *Botrytis cinerea* Pers. By R. K. S. Wood. (With 1 Text-figure) 203

12. The control of diseases of lettuce by the use of antagonistic organisms. II. The control of *Rhizoctonia solani* Kühn. By R. K. S. Wood . . 217

13. Bacterial wet rot of potato tubers following *Phytophthora infestans*. By W. J. Dowson and D. Rudd Jones 231

PAGE

14. Studies in bacteriosis. XXVII. Factors influencing infection by *Corynebacterium fascians* (Tilford) Dowson. By S. E. Jacobs and U. Mohanty. (With Plate 3) 237

15. The effectiveness of strains of the nodule organism when associated with different species of clover. By G. Bond and M. P. McGonagle . 246

16. The confirmation of the variety *fabae* Keay of *Sclerotinia trifoliorum* Eriksson. By A. R. Loveless. (With Plate 4 and 1 Text-figure) . . 252

17. The effect of infection with beet yellows and beet mosaic viruses on the carbohydrate content of sugar-beet leaves, and on translocation. By M. A. Watson and D. J. Watson. (With Plate 5) 276

18. A comparison of the growths of wild and of cultivated oats in manganese-deficient soils. By Joan M. Thurston. (With Plate 6 and 1 Text-figure) 289

19. Proceedings of the Association of Applied Biologists, 4–7 July 1950:

The relation of bracken control to hill-land farming. By K. W. Braid 303

The wintering problem with special reference to cattle. By J. W. Gregor 304

The tick problem in Scotland. By J. Allan Campbell . . 304

Tick-borne diseases of sheep in Scotland. By Angus Foggie . 305

Helminths in Scottish hill sheep. By D. O. Morgan . . . 305

Recent work on raspberry virus diseases. By C. H. Cadman . 306

Breeding strawberries resistant to disease. By Robert D. Reid . 306

Potato breeding in relation to disease resistance. By William Black 306

The potato activities of the Department of Agriculture for Scotland, 1918–50. By T. P. McIntosh 307

Reviews 308

No. 2 (June 1951)

1. Obituary. Mr G. Fox Wilson 311

2. Studies on systemic fungicides. I. Fungicidal properties of the aryloxyalkylcarboxylic acids. By S. H. Crowdy and R. L. Wain. (With 2 Text-figures) 318

PAGE

3. The action of mercury as a soil fungicide. By J. R. Booer. (With 10 Text-figures) 334

4. The subepidermal fungi of cereal grains. II. The nature, identity and origin of the mycelium in wheat. By M. B. Hyde and H. B. Galleymore. (With Plate 8 and 2 Text-figures) 348

5. Deposition of air-borne *Lycopodium* spores on cylinders. By P. H. Gregory. (With Plate 9 and 7 Text-figures) 357

6. Some properties of four strains of cucumber mosaic virus. By K. S. Bhargava. (With Plate 10) 377

7. Resolution of strawberry virus complexes. IV. The latent period of virus 3 in the vector. By I. W. Prentice and Tamsyn M. Woollcombe . 389

8. The influence of density of plant population on the incidence of yellows in sugar-beet crops. By J. W. Blencowe and T. W. Tinsley . . . 395

9. Serologically related strains of potato virus *Y* that are not mutually antagonistic in plants. By F. C. Bawden and B. Kassanis 402

10. Experiments on the colonization of potato plants by apterous and by alate aphids in relation to the spread of virus diseases. By L. Broadbent and T. W. Tinsley. (With 3 Text-figures) 411

11. Factors affecting the behaviour and activity of the cabbage root fly (*Erioischia brassicae* Bché). By Mary Miles. (With 1 Text-figure) . . 425

12. Wing coloration as a means of determining the age of the Colorado beetle (*Leptinotarsa decemlineata* Say). By E. Dunn. (With Plate 11 in colour) 433

13. The effect of manures on the bolting of the beet plant. By Harold H. Mann 435

14. Rat populations and control in two English villages. By S. A. Barnett, A. H. Bathard and Mary M. Spencer. (With Plates 12 and 13, 9 Text-figures and 2 Maps) 444

15. Control of the European rabbit (*Oryctolagus c. cuniculus* L.). An experiment to compare the efficiency of gin trapping, ferreting and cyanide gassing. By Harry V. Thompson and C. J. Armour. (With 3 Text-figures) 464

16. The control of blowflies infesting slaughter-houses. I. Field observations of the habits of blowflies. By A. A. Green 475

17. Studies on the mechanism of insecticidal action of organo-phosphorus compounds with particular reference to their anti-esterase activity. By K. A. Lord and C. Potter. (With 1 Text-figure) 495

PAGE

18. Insecticidal-action studies with bisdimethylaminophosphonous anhydride containing ^{32}phosphorus. By W. A. L. David 508

19. Proceedings of the Association of Applied Biologists, 29 September 1950:

Entomological research in the Overseas Food Corporation (Tanganyika). By A. C. Evans 526

Proceedings of the Association of Applied Biologists, 20 October 1950:

Legislation against plant diseases and pests in England and Wales. By W. C. Moore 529

Inspection procedure in England and Wales. By A. P. Winsor . 531

The Sugar Beet Eelworm Order 1943. By F. G. W. Jones . . 535

The Progressive Wilt of Hops Order. By W. G. Keyworth . 537

Some scientific aspects of the certification schemes for fruit plants. By R. V. Harris 538

Proceedings of the Association of Applied Biologists, 8 November 1950:

Marking and breeding *Testacella* slugs. By H. F. Barnes and Barbara M. Stokes. (With 4 Text-figures) 540

Technical and biological aspects of insect drift. By C. G. Johnson 545

The preferences shown by honey-bees for certain nectars. By Gwenyth R. Wykes 546

The expression of symptoms of leaf-roll virus in potatoes. By J. H. Wilson 546

The effect of microclimate on the establishment of timothy (*Phleum pratense*). By Stella S. Williams 547

Reviews 550

No. 3 (September 1951)

1. The penetration of the insect cuticle by isomers of benzene hexachloride. By G. Armstrong, F. R. Bradbury and H. Standen. (With 1 Text-figure) 555

2. Particle size of insecticidal suspensions and their contact toxicity. III. Temperature coefficients and tests by injection. By A. H. McIntosh. (With 4 Text-figures) 567

3. The influence of heat on some aphids. By L. Broadbent and M. Hollings. (With 2 Text-figures) 577

4. An improved suction trap for insects. By L. R. Taylor. (With Plate 14 and 2 Text-figures) 582

PAGE

5. A study of the biology and control of *Anisopus fenestralis* (Scopoli, 1763), a fly associated with sewage filters. By H. A. Hawkes. (With Plate 15 and 6 Text-figures) 592

6. Population studies on *Hylobius abietis* (L.) (Coleoptera, Curculionidae). By G. Swaine. (With 3 Text-figures) 606

7. The effect of temperature on the development of the potato-root eelworm, *Heterodera rostochiensis*. By D. W. Fenwick 615

8. Observations on the attack by the stem eelworm, *Ditylenchus dipsaci*, on strawberry. By J. B. Goodey. (With Plate 16 and 1 Text-figure) . . 618

9. Some interrelationships between manganese, molybdenum and vanadium in the nutrition of soybean, flax and oats. By Katherine Warington. (With Plates 17 and 18) 624

10. Observations on the biology of clover rot. By A. R. Loveless. (With Plate 19 and 2 Text-figures) 642

11. Effects of cultural treatments on wheat and on the incidence of eyespot, lodging, take-all and weeds. Field experiments 1945–8. By Mary D. Glynne. (With Plate 20 and 11 Text-figures) 665

12. The spread of lettuce mosaic in the field. By L. Broadbent, T. W. Tinsley, W. Buddin and E. T. Roberts. (With 4 Text-figures) . . 689

13. A virus disease of red currant (*Ribes rubrum* L.). By P. J. Klesser. (With Plate 21) 707

14. Proceedings of the Association of Applied Biologists, 13 December 1950:

Cacao pod diseases in West Africa. By Harold Owen . . 715

The work of the colonial government entomologist. By W. F. Jepson. (With 2 Text-figures) 719

Development of insecticide-resistant fly populations. By J. F. Newman 721

Proceedings of the Association of Applied Biologists, 16 March 1951:

Observations on the wood-mouse (*Apodemus sylvaticus*). By A. Roebuck 722

Rats, mice and agriculture. By Dennis Chitty 724

Rabbits and other rodents. By Harry V. Thompson . . . 725

Birds in relation to agriculture. By J. W. Evans 728

Report of the Council of the Association of Applied Biologists for the year 1950 729

Accounts 741

No. 4 (December 1951)

1. The spread of beet yellows and beet mosaic viruses in the sugar-beet root crop. I. Field observations on the virus diseases of sugar beet and their vectors *Myzus persicae* Sulz. and *Aphis fabae* Koch. By Marion A. Watson, R. Hull, J. W. Blencowe and Brenda M. G. Hamlyn. (With 3 Text-figures) 743

2. The reaction of virus-infected potato plants to *Phytophthora infestans*. By K. O. Müller and J. Munro. (With 1 Text-figure) 765

3. Some properties of broad-bean mottle virus. By F. C. Bawden, R. P. Chaudhuri and B. Kassanis. (With Plate 22) 774

4. Virus diseases of cacao in West Africa. VIII. The search for virus-resistant cacao. By A. F. Posnette and J. McA. Todd 785

5. Studies in *Rubus* virus diseases. I. A latent virus of Norfolk Giant raspberry. By C. H. Cadman. (With Plate 23) 801

6. Some experiments and field observations on the germination of wild oat (*Avena fatua* and *A. ludoviciana*) seeds in soil and the emergence of seedlings. By Joan M. Thurston. (With Plate 24 and 4 Text-figures) . . . 812

7. Observations on brown rot (*Sclerotinia fructigena*) of apples in relation to injury caused by earwigs (*Forficula auricularia*). By H. E. Croxall, C. A. Collingwood and J. E. E. Jenkins. (With Plate 25 and 6 Text-figures) 833

8. The influence of *Nosema apis* on the larval honeybee. By M. H. Hassanein 844

9. Observations on the life history and biology of *Tipula lateralis* Meig. By J. H. White. (With 7 Text-figures) 847

10. Mustard oils and control of the potato-root eelworm, *Heterodera rostochiensis* Wollenweber: further field and laboratory experiments. By C. Ellenby. (With 1 Text-figure) 859

PAGE

11. A simple method for testing the toxicity of volatile antiseptics to wood-rotting fungi. By W. P. K. Findlay and J. W. Vernon. (With 1 Text-figure) 876

12. Particle size of insecticidal suspensions and their contact toxicity. IV. Mechanisms of action of different-sized particles. By A. H. McIntosh 881

13. Proceedings of the Association of Applied Biologists, 18 April 1951:
The chemical control of the apple sawfly. By A. H. M. Kirby . 899
Conversazione, 27 July 1951:
